

Relocating Sensitive Technology Equipment is Our Specialty

Many of the top technology companies in Northern California rely on NOR-CAL to move their sensitive equipment, including server racks and components, software labs, chip manufacturing equipment, clean rooms, and all manner of hardware.

Our highly trained workforce has extensive experience handling technology's most challenging logistical assignments—safely packing, loading and unpacking, using the best people available and proper, well-maintained equipment. Just ask companies like Intel, eBay, Cisco Systems, Oracle and Microsoft.

NOR-CAL Moving Services:

Top People—NOR-CAL's foremen and drivers have an average of 10 years' service with our company, guaranteeing quality, skill and project continuity.

Industry Leader—NOR-CAL moves more companies than the next three movers combined.

Planning—NOR-CAL's professional account representatives are the most experienced in the industry. They bring cost- and time-saving planning expertise to every move.

Asset Management—NOR-CAL's On-Line Storage management system leads the industry, enabling you to direct the handling of your stored assets from your computer.

Easy Access—With three Bay Area warehouse facilities totaling over 400,000 square feet, we provide service to you in a timely manner wherever you are located.

Focused Staff—NOR-CAL drug screens all job applicants prior to employment and regularly conducts random tests to ensure quality performance.

Scope of Service—Office relocations, modular furniture installations, storage, seismic bracing, household goods relocations, shelving, warehouse relocations, material handling, library relocations and light rigging.
